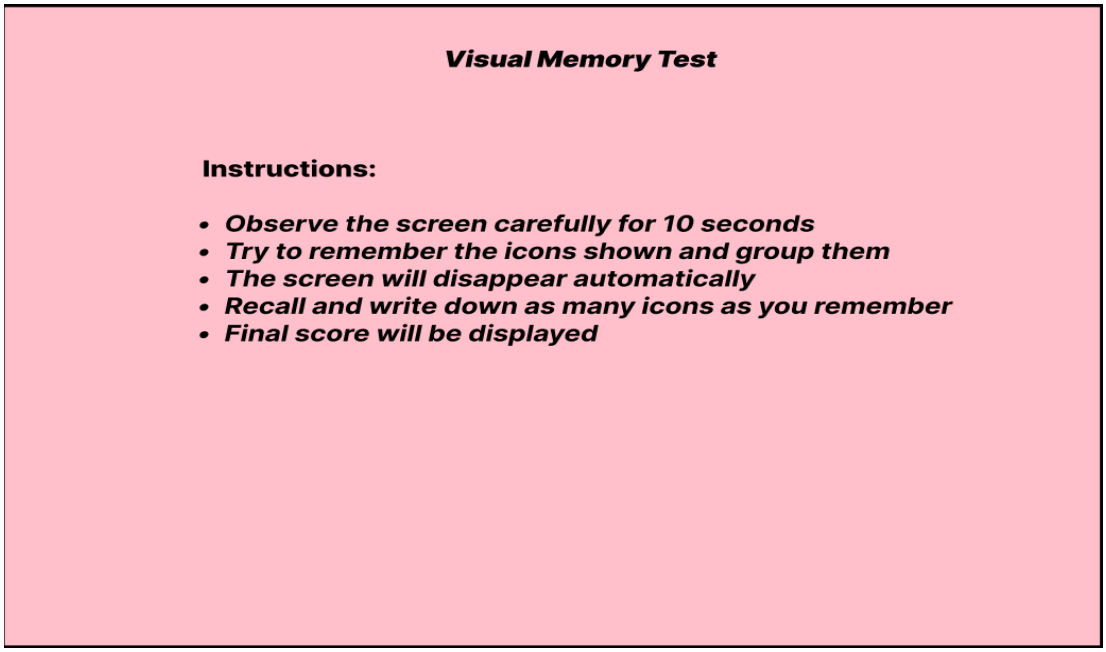
VISUAL MEMORY TEST

INSTRUCTION SCREEN:

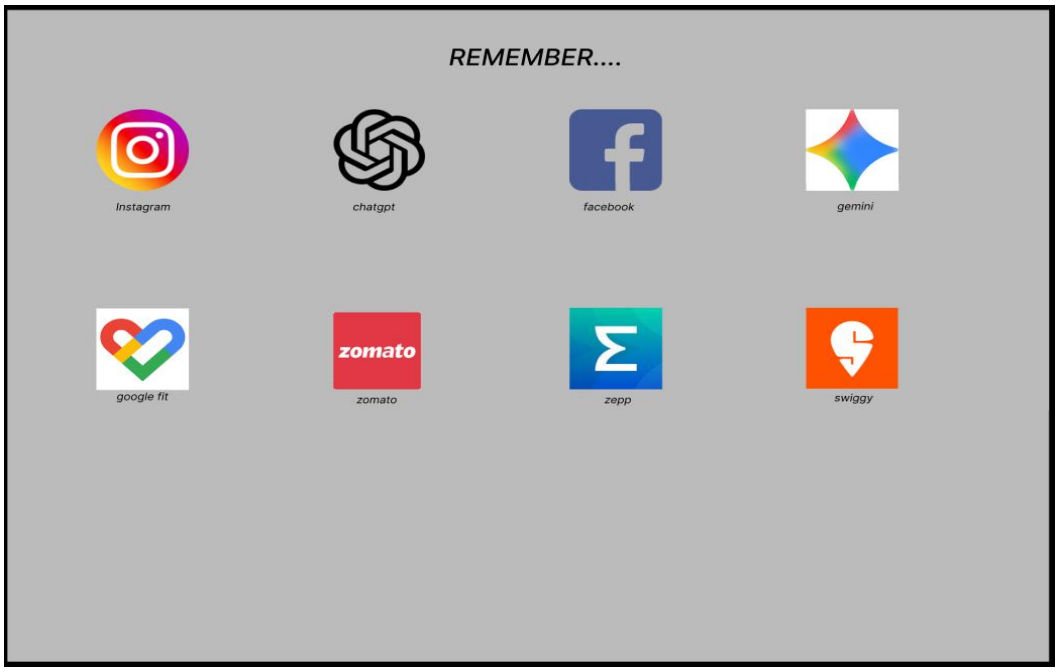


This page introduces the Visual Memory Test to the user. It clearly explains how the test works and what the participant should do. The instructions guide the user to observe the screen for 10 seconds, remember the icons, and recall them later.

Purpose:

- Sets clear expectations
- Explains rules before starting
- Prepares the user mentally for the task

Memory Display Screen:



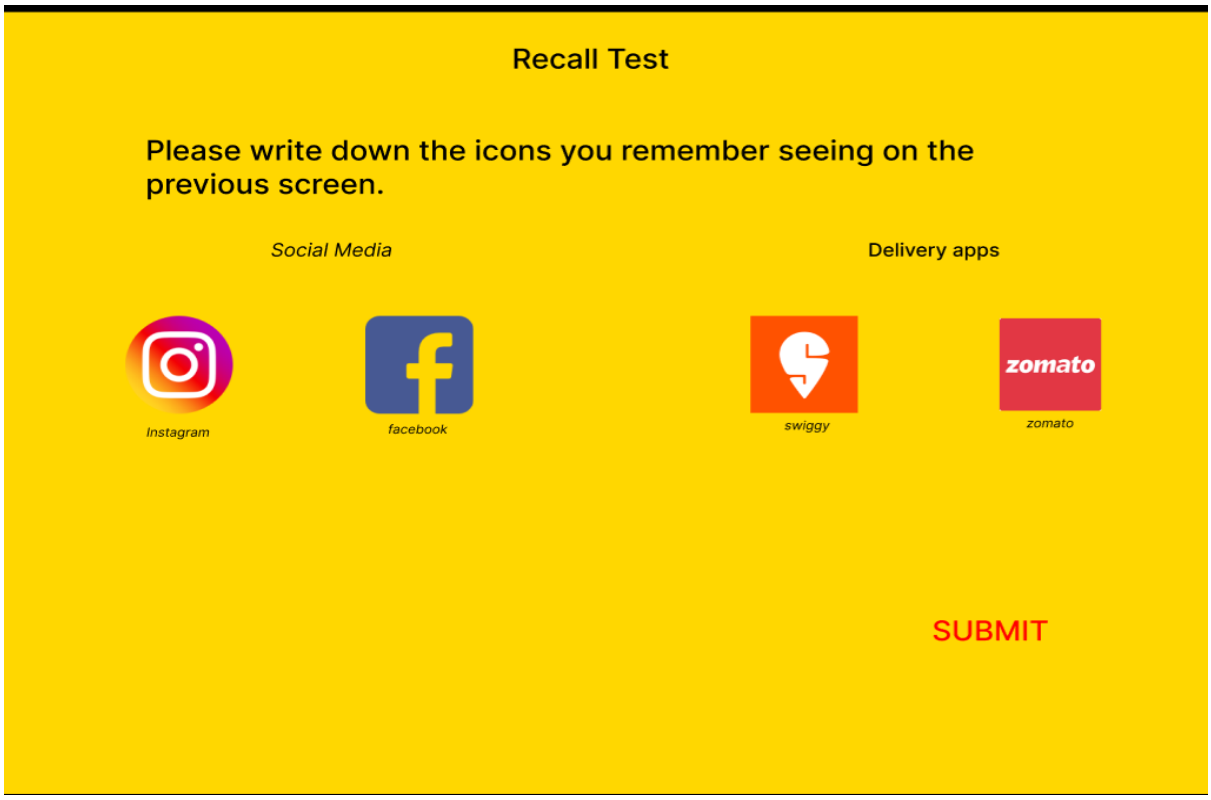
This page shows multiple brand icons such as social media, AI tools, fitness, and delivery apps. The user is given limited time to observe and memorize them.

Purpose:

- Tests visual attention
- Encourages grouping strategy (categorizing icons)
- Activates short-term memory

This is the core cognitive challenge screen.

Recall Test Page:



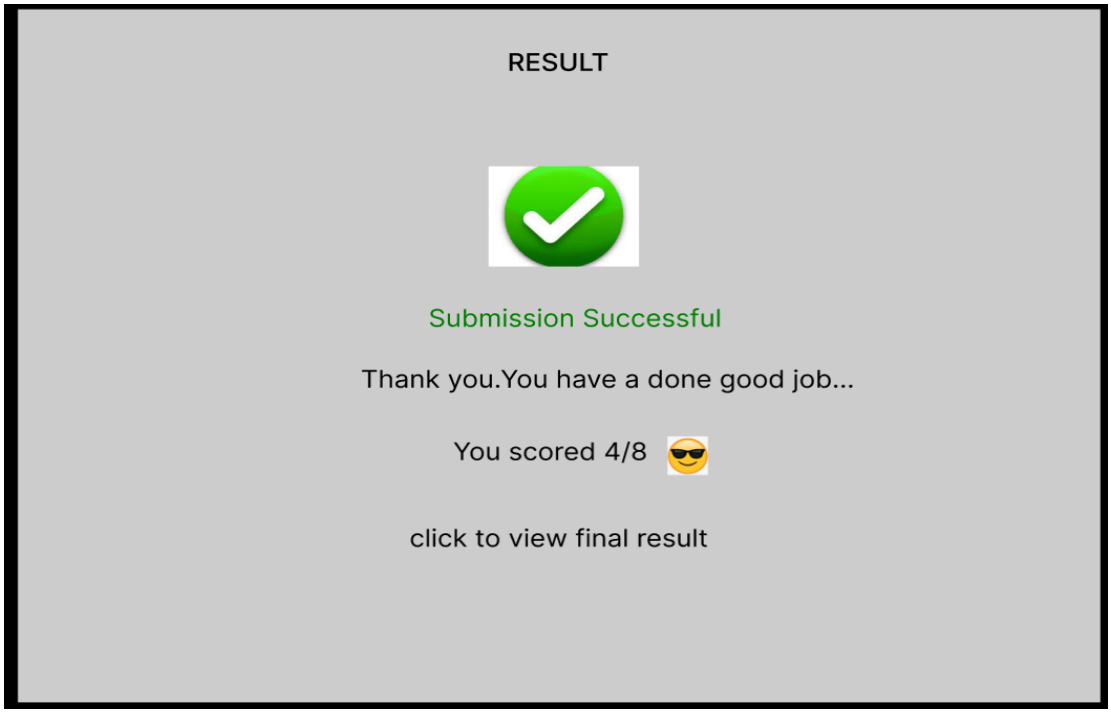
On this page, users are asked to recall and identify the icons they remember from the previous screen. The icons are grouped under categories like Social Media and Delivery Apps.

Purpose:

- Evaluates memory retention
- Tests recall ability
- Measures accuracy of observation

This is the evaluation stage of the test.

Result Page:

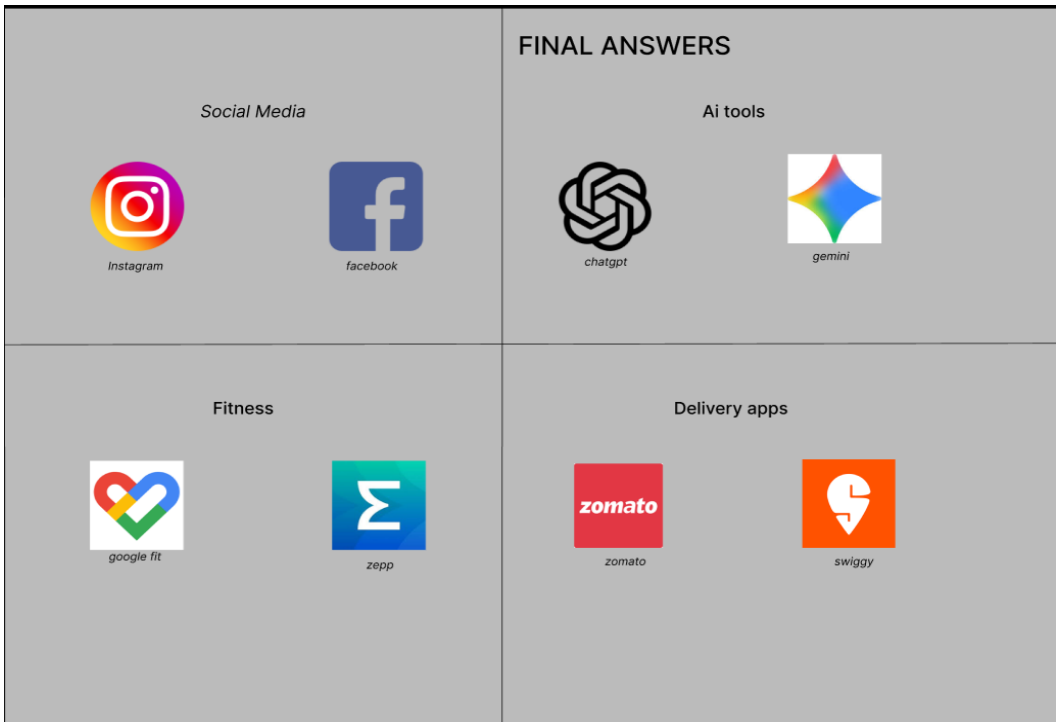


This page shows whether the submission was successful and displays the user's score (e.g., 4/8). It also provides feedback and encourages the user.

Purpose:

- Provides performance feedback
- Motivates the user
- Shows test outcome clearly

Final Answers Page:



This page displays all the correct icons grouped into categories: Social Media, AI Tools, Fitness, and Delivery Apps.

Purpose:

- Allows comparison with user answers
- Helps learning and correction
- Shows the complete solution clearly
